

Building Good Habitats

METAPUZZLE

GRAD

The behemoth of a beaver is apparently just upset that its new lodge is not coming along to schedule. It's missing four planks of wood, which need to be cut up along the thick lines, and then rotated with the rest of its construction material. They should be assembled according to the blueprints below so that all pieces go into the plans below. When complete, all the requested features should be found around the lodge:

- Places to be outside while upstairs
- A chamber for serving large feasts (2 wds.)
- Squishy alternatives to chair or sofas
- Power tools for loggers
- Something to keep the door locked
- Something for guests to press
- Somewhere to prepare food
- Somewhere for rockets to take off
- A bathroom alternative
- An area in front of the stage curtain
- Tiles for the roof
- A record player, maybe for a DJ
