

# Press Tour

META-METAPUZZLE

GRAD

Our successful efforts at the stations distracted Doolittle long enough to allow his remaining lab animals to escape!

They want to expose Doolittle's whole diabolical plan to the media... with multiple press conferences. They arranged the following schedule for which Green Line Extension stops they'll be available at, one animal per column.

However, it seems each animal only has the correct time for two of its stops! Each animal has a different pair of stations correct, resulting in exactly five correct appearances at each station. Can you catch up with them and see how they think we should handle Professor Doolittle?

Medford / Tufts	3:01	5:02	2:03	4:04	4:05	2:06	4:07	5:08	7:09	7:10	3:11	2:12	5:13	4:14	7:15
Ball Square	2:01	1:02	4:03	5:04	2:05	7:06	2:07	6:08	1:09	3:10	5:11	7:12	7:13	1:14	2:15
Magoun Square	7:01	3:02	3:03	6:04	5:05	3:06	1:07	3:08	3:09	1:10	7:11	5:12	6:13	7:14	4:15
Doolittle's Lab															
Gilman Square	6:01	6:02	6:03	3:04	1:05	5:06	6:07	7:08	5:09	2:10	1:11	3:12	3:13	3:14	5:15

Union Square	1:01	4:02	5:03	7:04	7:05	6:06	3:07	1:08	6:09	5:10	2:11	1:12	2:13	5:14	1:15

Be sure to remind them that you helped stop the giant animals attacking each station when interviewing these normal-sized animals.

- A vulture who answers questions quickly on game shows?
- An aquatic mammal with a Barbie-like flipper?
- An egg-laying mammal that sounds like a baby goat? I don't think so.
- A bright bug that will lay off the zipper on its pants?
- A fish that might lead you down a wrong solving path?
- A large cat that is easy to spot?
- A crustacean known for throwing rocks?
- A mongoose that is just a feline?
- A large bird with wealthy (or perhaps flavorful) bones?
- A flightless bird heading to a formal event after this?
- A mythical bird that can eliminate a surcharge?
- An arthropod taking too many vitamins?
- A maritime avian that lefts its flock back in the '80s?
- A small seed-eating bird that likes to fight *and* argue?
- A tusked mammal that won't share any skin growths?
